

Driving Challenge Åre 2024

An experience for those who want to combine utility with pleasure. Challenge your customers, colleagues, or friends at Åre Ice Track.

Introduction

We start with a review of the cars' function and equipment as well as the safety rules for driving on the ice track. Then we go through the correct driving position and the schedule of the day.

Brake with evasive manoeuvre

A sudden obstacle pops up in the middle of the road. How does a modern car react with all the technology? You learn how to prevent an accident in the classic "moose test".

Training in a drift car

You start driving at your own pace and our instructor teaches various techniques, such as braking and steering. We increase the speed and you practice until you find the perfect line around the track.

Finale

Time to test your skills. We increase the pace and starts the watch – who's fastest around the lap?

After race

We evaluate the driving and presents top 3, not always the fastest but many times the wisest.

The activity takes about 3 hours. Other arrangements can be implemented as desired!
